

The Packaging Factory, Ltd.

Your Cook-Chill Supply Center

*One-stop shopping
for all of your
Cook-Chill Supplies*

The **Packaging Factory, Ltd.** offers one-stop shopping for bags, clips, labels, chart paper, food grade grease and other supplies used in cook-chill production. We offer high quality products, competitive pricing and great service. Most products can be shipped immediately from our large inventory.

We provide many types and sizes of durable, flexible packaging, which tolerate temperatures as low as -20°F for freezing and up to 250°F for hot packaging and reheating. Our cook-chill bags come factory clipped or heat-sealed and are very easy to open.

Our line of "Souper Bags" and "Meat Bags" offers great cook-chill benefits:

- ✓ Retains the high quality of food, aroma, texture and taste
- ✓ Extends product shelf life
- ✓ Provides a safe, clean, sanitary way of protecting food from contamination
- ✓ Makes handling, transporting and reheating food easy

Cook-chill "**Souper Bags**" are strong enough to withstand rapid chilling in an ice water tumble chiller, long storage in a food bank refrigerator or freezer and transportation from the central kitchen to the service kitchen.

Cook-chill "**Meat Bags**" shrink around the product for maximum temperature transfer during cooking and chilling.

Custom sizes can be provided upon request.

Note: Custom sizes and material thicknesses are available upon request.

COOK-CHILL MEAT BAGS

Our premium quality *Meat Bags* are recommended for cooking and chilling of vacuum packaged foods such as meats, vegetables and rice in a **Cook-Chill Tank**. This specially formulated meat bag material helps to improve shelf life and to increase product yield. Low temperature water-bath **Cook Tank** cooking reduces product shrinkage, increases tenderness of meats and retains natural juices and flavor.

CLIPPED MEAT BAGS

Model	Fill Capacity	Size	Case pack
MB-1224	6-8 lbs.	12" x 24" long	500
MB-1226	8-10 lbs.	12" x 26" long	500
